---

### SOFTWARE ENGINEER | PROJECT MANAGER

Software Development • Agile Methodologies • SDLC Management • Team Leadership

---

### CERTIFICATIONS

- Project Management — Fusions Tek, Texas, USA
  - Software Engineering — Zulfah Academy
- 

### TECHNICAL SKILLS

- **Programming Languages:** JavaScript , Python
  - **Databases:** MongoDB, MySQL, PostgreSQL, SQL, NoSQL
  - Project Management: Jira, Git, Agile , Waterfall
  - Development Tools: Version Control Systems
  - Software Development: SaaS, SDLC, Web Applications
  - Other Skills: Leadership, Excellent Communication, Attention to Detail
- 

### PROFESSIONAL EXPERIENCE

#### Software Engineer

Zulfah Academy — Maryland, Lagos State

*Jan 2022 – Present*

- Collaborated with senior engineers to design, develop, and test software applications in an Agile/Scrum environment.
- Contributed to the development of web-based and desktop applications, utilizing Python and JavaScript to create new features and enhancements.
- Assisted in debugging and troubleshooting software defects in both development and production environments, improving system stability by 20%.
- Provided responsive customer support, contributing to a 10% increase in customer satisfaction.
- Gained hands-on experience with version control systems like Git and project management tools like Jira, ensuring smooth team collaboration.
- Participated in code reviews and offered constructive feedback to junior developers, promoting best practices within the team.

- Operate and monitor batching plant machinery to ensure efficient production of concrete or other materials as per project specifications.
- Manage and adjust plant settings to meet required batch proportions and production schedules.
- Supervise material storage (cement, aggregates, admixtures, etc.) and ensure adequate supply to avoid production delays.
- Perform routine maintenance and troubleshooting of batching equipment to minimize downtime and ensure smooth plant operations.
- Oversee plant safety protocols, ensuring that all staff adhere to safety regulations and use appropriate personal protective equipment (PPE).

---

## **PROJECTS**

### **Project 1: Backend for Utility Payment Services.**

- **Description:** Developed a backend system to manage utility services like electricity, airtime and Mobile Data . The system handles user authentication, service management, and payment processing
- **Tech Stack:** Node.js, Express.js, MySQL, JWT (JSON Web Tokens)
- **Role:** Backend developer – implemented core API functionalities, designed database schema, and integrated third-party payment services.
- **Link:** [git repositories](#)

### **Project 2: Frontend for Utility Payment Services**

- **Description:** Developed a user friendly and responsive interface for utility service users to manage accounts, view utility bills, and make payments.
- **Tech Stack:** React, Tailwind CSS, Axios, Redux
- **Role:** Frontend developer – responsible for designing the user interface, integrating the backend API, and ensuring smooth user interactions.
